

Dear F.C.C., I have been a subscriber to xm since 2001 and find the service to be invaluable , entertaining and topical with current news,BBC World Service and especially their recent addition of Instant Traffic and Weather. I have children in school in Fayetteville,NC and in Boston,MA and I commute daily in and out of DC...so their multi-city traffic and weather service has become a daily part of my listening and important when I travel.

There's no "local" service that's 24/7 and covers areas outside their signal area. It's also fun to know that it's 104 in Phoenix!

Please do not yield to the NAB and their lobbyists. If I pay for national service, that's what I should hear. XM service is GREAT!!  
Oppose HR 4026.

Sincerely,  
John Broderick
